4. Create a following HTML page.
This is your first HTML page!

Seems like things are going pretty well so far

Let's add a recipe for some delicious chocolate chip cookies

We're going to borrow a nice picture from General Mills

Here is what the recipe calls for

Ingredients (probably not right...)

- 6 Eggs
- 2 Cups of flour
- 2 Tablespoons of vanilla extract
- 2 Teaspoons of baking powder
- 1 Cup of sugar

Instructions (may or may not be correct)

1. Add eggs, flour and vanilla extract and mix
2. Combine with sugar and baking powder and stir
3. Eat half the cookie batter because it is delicious
4. Take the rest of the cookie batter and make cookies
5. Bake at 350 for 25 minutes
6. Enjoy!

5. Create following form using only HTML.
